

Keeping moisture out of buildings since 1987

Experience Modification Rating

An EMR rating has strong impact upon a business. It is a number used by insurance companies to gauge both past cost of injuries and future chances of risk.

A company's EMR is a numeric representation of a business's claims history and safety record as compared to other businesses in the same industry, within the same state. Every company starts with an EMR of 1.0 with no experience history.

Radco's EMR is .71, representing an exceptionally low risk of doing business with our company, due to extraordinary measures taken to ensure safety as a priority.
