

Corporate Profile

Radco Roofing is a locally owned contracting company specializing in commercial and industrial roofing and exterior maintenance since 1987. We are also a founding partner of National Roofing Partners (NRP), an association of over 150 premier contractors nationwide, that services clients with a national foot print. Our goal is to assist our clients in the maximization of their roofing and exterior maintenance investment. To accomplish this goal it is important to help the building manager make cost effective decisions regarding the upkeep of each facility's roof.

It is our commitment to help identify how to extend the life of each roof to its maximum while keeping it reliable and watertight. This can only be accomplished if the client has confidence in our intention to act in the building manager's best interest. By assisting in the ongoing basic maintenance of a facility, by recommending only work which is truly necessary, and by performing it in compliance with all industry, manufacturer, and government standards, we can establish this level of trust over the long run.

To be effective in analyzing an owner's needs Radco must be familiar with the latest advances in products and technologies available in the industry. To stay abreast of such changes we are members of the National Roofing Contractors' Association (NRCA) as well as the Carolinas Roofing and Sheet Metal Contractors' Association (CRSMCA) and other professional organizations. In addition, many manufacturers of major roof systems and other products offer educational seminars to their approved contractors. It is our commitment to our clients and our employees to ensure that our staff is fully trained in these technologies.

Radco Roofing also assists in the management of the entire roof maintenance process. Our services include maintenance contracts; surveys, reports, analysis, and historical records; repairs; contract services consisting of replacement, retrofit, and new construction; and cost and budgeting recommendations. We have experience in the application and maintenance of many roof systems including both EPDM and thermal plastic single ply, built up, modified bitumen, metal, shingle, slate, tile, and liquid applied. In addition, we work with caulking, architectural sheet metal, masonry and metal coatings, and waterproofing applications.

As demonstrated by our Reference List, Radco Roofing has provided services to many prestigious corporations in the region. These organizations can testify to our client service orientation, timely service, quality workmanship, professional application, well trained staff, excellent safety record, and cost effective products. We are confident that Radco can assist you in your roofing and exterior maintenance needs.
